

EV CHARGING SUPPORT

THE FUTURE IS NOW

Technology is evolving rapidly and we are at the precipice of the all-electric economy revolution. Electric Vehicles will play a major part in this transition and powering them will be a critical task in both residential and commercial applications. Middy's have the expertise to show you how.

Ensuring the product is fit for purpose, reliable and safe are key components to building a great smart solution. Let Middy's help you plan and execute your next home or commercial EV Charging opportunity. We believe by partnering and leveraging each other's strengths we can together deploy the right charging technology across Australia.

PROCESS:

- 1. Qualification**
Contractor to consult with end-user to complete EV charging installation online form.
- 2. Consultation**
Middy's arrange a time to meet on site, in conjunction with installer.
- 3. Documentation**
Middy's will prepare quotation, including product, commissioning fee (where required) and product information for installer.
- 4. Installation**
Contractor to quote end client and install product.
- 5. Commissioning**
If required by installer a Middy's Integrator will assist with commissioning.

INTEGRATION TEAM:

With over 50 years in the electrical automation industry the Middy's Integration team and approved partners provide design, documentation, and commissioning services. Continuously reviewing new and emerging technologies allows us to stay ahead of the game and provide best in class solutions and support.

Middy's are a brand agnostic solution provider specialising in:

- ✓ Residential renovations
- ✓ Large volume home builders
- ✓ Boutique and high-end homes
- ✓ Small commercial projects
