Albury McDonald's Stores

CCTV UPGRADES

Top Security Albury are licensed security alarm installation technicians, providing good old-fashioned service for homes and businesses in the Albury and Wodonga, Upper Murray and Riverina regions of North East Victoria. Owner and Director of Top Security, Gary Quirk, was approached by a return customer and asked to complete CCTV upgrades across three McDonald's stores in Albury. The customer was after reliable, user-friendly products that suited a versatile industry.

Gary reached out to the Middy's TechEnergy team to consult on the project and help provide the best solution. After reviewing each of the store plans, the TechEnergy team recommended Dahua's Motorised Dome Cameras, as they provide great angle flexibility in confined spaces. The cameras would also be a significant upgrade on the existing analogue cameras, with superior image quality allowing greater quality control and peace of mind concerning staff and customer safety.

THE INSTALL:
CCTV UPGRADES ACROSS 3 STORES

Following the installations, the Albury McDonald's management team were provided product training to ensure they were receiving the full benefits of the systems. They were most pleased with the ability to login remotely to any given camera and were extremely satisfied with their viewing experience. Another job well done by Top Security Albury.

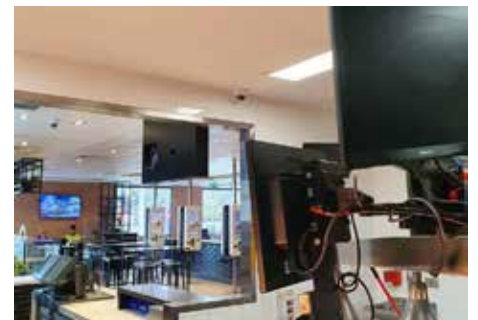

I love Middy's. The Middy's TechEnergy team have helped me to improve my technical knowledge and in turn, grow my business. I will continue to call on the team for their technical support and product knowledge.

Gary Quirk
Owner and Director, Top Security

THE INSTALL:

- ▶ Dahua Motorised Dome Cameras
- ▶ CCTV Monitors
- ▶ Product Training
